Job Title • Analyst

Location • Delhi

Job Overview

We seek a detail-oriented Analyst (Bengali) to interpret Bengali content, analyze data, and identify trends for business decisions. Responsibilities include Python scripting for automation and analysis, ensuring linguistic accuracy and regional relevance, collaborating with cross-functional teams, and maintaining confidentiality with sensitive information.

Job Responsibilities

- Translate, review, and interpret documents/content/Voice clips in Bengali.
- Required working knowledge of Python for scripting, automation, or analysis support.
- Interpret complex information using strong analytical, research, and data analysis skills.
- Track and analyze key market issues and socialized topics within the region to provide timely insights and strategic recommendations.
- Process and analyze publicly available data and news, focusing on specific regions, industries, and cultural trends.
- Collaborate with subject matter experts and cross functional teams to improve language accuracy, regional models, and related processes.
- Maintain strict confidentiality of all sensitive and confidential information.
- Good understanding of the cultural and regional context of Bengali-speaking regions.

- Candidates with a technical background and working knowledge of Python, along with strong Bengali language skills, are encouraged to apply.
- Prior experience in translation, operations, content analysis, or research is an added advantage.

Technical Skillsets (Mandatory)

- Fluency in Bengali and English (written and spoken).
- Ability to translate, review, and interpret documents, written content, and voice clips accurately.
- Strong cultural understanding of Bengali-speaking regions to ensure contextually appropriate communication.
- Good analytical and critical-thinking skills with an operations-focused approach.
- Working knowledge of Python for basic scripting, automation, or analysis support.
- Ability to evaluate credibility, relevance, and context of information from multiple sources.
- Proficiency in using relevant software, tools, and platforms for content review and analysis.
- Excellent verbal, written, and interpersonal communication skills.
- High attention to detail with strong documentation skills.

Qualifications & Certifications

- Diploma or Certification in Bengali Translation/Interpretation from a recognized institute.
- Bachelor's degree in Bengali Language, Computer Science, Information Systems, or a related field.

Experience

1-3 Years of experience
