Our work spans multiple sectors and industries, including Telecommunications, Defense and Military, ITeS, Financial Services, Aviation, Hospitality, Healthcare and Research. We work end-to-end—from diagnosis to delivery of lasting impact — together generating tangible results that are improving the security posture of organizations worldwide.

We are looking for passionate Information Security Professionals to help us keep growing. If you're excited to be part of a winning team, HackIT Technology & Advisory Services is a perfect place to get ahead.

Job Title   • Analyst

Location   • Delhi

Job Overview

We are looking for a detail-oriented Analyst (Burmese) to join our team. In this role, you will interpret information, track market trends, and provide insights to support business decisions. You will work closely with experts and cross-functional teams to ensure accurate language use, strong regional understanding, and smooth processes. The role also requires strict confidentiality when handling sensitive information.

Job Responsibilities

- Translate, review, and interpret documents/content/audio in Burmese.
- Interpret complex information using strong analytical, research, and data analysis skills.
- Track and analyze key market issues and socialized topics within the region to provide timely insights and strategic recommendations.
- Process and analyze publicly available data and news, focusing on specific regions, industries, and cultural trends.
- Collaborate with subject matter experts and cross functional teams to improve language accuracy, regional models, and related processes.
- Maintain strict confidentiality of all sensitive and confidential information.

Technical Skillsets (Mandatory)

- Proficiency in Burmese and English (both written and spoken).
- Ability to translate, review, and interpret documents, content, and audio in both languages.
- Cultural competence – strong understanding of Burmese culture to ensure accurate and contextually appropriate communication.
- Technical proficiency – skilled in using relevant software and translation tools.
- Excellent communication skills – strong verbal, written, and interpersonal abilities.

Qualification & Certifications

- Diploma or Certification in Burmese Translation / Interpretation (from recognized institutes).
- TOEFL / IELTS (for English proficiency).
- Bachelor's degree in Linguistics, Translation, Burmese Language, International Relations, or Communication.
- Candidates with a degree in Computer Science, Information Security, or Data Analytics plus strong Burmese language skills are also encouraged to apply.
- Strong understanding of geopolitical, social, and cultural contexts of the Burmese-speaking region prior experience in translation, intelligence analysis, or cybersecurity research is a plus.

Experience

0-3 Years of experience
