- Security Analyst (OSINT & Threat Intelligence)
- Location**
- Delhi

Job Overview

We are looking for a detail-oriented Security Analyst (OSINT & Threat Intelligence) to join our Security Testing team. In this role, you will collect, analyze, and interpret open-source intelligence to support risk assessments and ongoing security operations. You will work closely with internal experts and clients, ensuring accurate insights, timely threat monitoring, and high-quality reporting. This position requires strong analytical skills, hands-on OSINT experience, and the ability to manage sensitive information with complete confidentiality.

Job Responsibilities

- Conduct comprehensive intelligence gathering from diverse open sources, including social media, news platforms, forums, and other publicly available channels, using advanced OSINT tools and techniques.
- Analyze and interpret large datasets to identify trends, patterns, anomalies, and actionable insights, while evaluating the credibility, relevance, and reliability of information sources.
- Prepare clear, concise, and structured intelligence reports highlighting key findings, risks, and actionable recommendations for stakeholders.
- Continuously monitor open sources for emerging threats, vulnerabilities, and relevant global or industry developments.
- Collaborate with internal teams (security analysts, threat intelligence teams) and external stakeholders, including law enforcement agencies where applicable, to enhance situational awareness.

- Contribute to the development, optimization, and automation of OSINT tools, processes, and methodologies to improve operational efficiency.
- Ensure all intelligence activities comply with applicable laws, data privacy regulations, and organizational security policies.

Technical Skillsets (Mandatory)

- Hands-on experience in OSINT and social engineering techniques.
- Basic understanding of penetration testing concepts.
- Strong analytical and problem-solving skills with the ability to communicate complex findings clearly.
- Experience with enterprise and open-source security tools for reconnaissance, scanning, and analysis

Technical Skillsets (Preferred)

- Proficiency in a programming language(s) (e.g. Python).
- Hands-on experience in Threat Hunting, Threat Intelligence, and Threat Modeling.

Education and Certifications

- Bachelor's degree in IT or equivalent.
- Industry recognized certifications preferred.

Experience

- 1 to 3 years' experience
