### Job Overview

We are seeking a detail-oriented Network Engineer with hands-on experience in networking and a strong interest in secure network infrastructure. The ideal candidate will support the configuration, monitoring, and security of network environments while ensuring high availability, performance, and compliance.

### Job Responsibilities

- Assist in configuration and management of core, distribution, and access layer switches.
- Support secure network operations including monitoring, logging, and incident response.
- Work with routing protocols such as BGP and OSPF under supervision.
- Maintain high availability and performance of network systems.
- Implement and support network security controls (firewalls, ACLs, segmentation).
- Monitor network traffic to identify security threats and anomalies.
- Collaborate with cybersecurity and infrastructure teams for secure architecture implementation.
- Maintain network documentation, diagrams, and SOPs.

### Technical Skillsets (Mandatory)

- 2+ years of experience in networking and troubleshooting.
- Hands-on experience with Cisco switches (NX-OS or similar).
- Understanding of routing protocols (BGP, OSPF).
- Knowledge of network security concepts (Firewall, VPN, IDS/IPS, ACLs).
- Familiarity with Datacenter networking (Spine-Leaf architecture).
- Basic understanding of VXLAN or network segmentation.

### **Technical Skillsets (Preferred)**

- Exposure to secure network design or SOC environments.
- Basic scripting/automation (Python, Bash).
- Knowledge of log analysis and monitoring tools.

### **Education and Certifications**

- Bachelor's degree in IT, Computer Science, or a related field.
- Certifications such as CCNA / Security+ and other relevant certifications are an added advantage.

### **Experience**

- 2+ years' experience.
